

PRZEKRÓJ B-B

This architectural cross-section, labeled B-B, illustrates the structural layout of a building. The drawing includes the roof structure, walls, floor, and foundation. Key features and annotations include:

- Roof:** The roof is shown with a gable structure. A note indicates the construction of a new steel roof using HEB180 beams, secured against fire to REI60 class.
- Walls and Ceilings:** Various wall and ceiling sections are detailed, including the removal of existing wooden ceilings and the installation of new wooden or steel structures, some fire-protected to REI15 or REI60.
- Floors:** The floor structure shows the removal of existing wooden floors and the installation of new concrete slabs (S3 and S2) and a new ground floor.
- Foundations:** The foundation details include the removal of existing foundations and the construction of new concrete foundations (100x160x40cm).
- Dimensions:** Numerous dimensions are provided for structural elements, including wall thicknesses, floor heights, and foundation widths.
- Levels:** Elevation markers are shown, such as +0.00 for the ground level and -1.82 for the foundation level.
